REVIEW ABOUT CRC 649 EVENTS

14 – 17 September 2010

Doctoral Seminar Empirical Accounting Research

From 14 to 17 September 2010, project A7 of CRC 649 jointly with the VHB hosted a workshop on empirical accounting research at the Humboldt-Universität zu Berlin. About 20 doctoral students from Germany and Austria spent four days in Berlin to present and discuss current work in the area of accounting choice, earnings management, information and asset pricing as well as corporate governance. Also, the attendants used accounting and capital market data provided to them by the RDC to conduct group work-based empirical projects. The results of these group assignments were presented and discussed in a workshop format. A friendly, focused and research-oriented atmosphere helped to make this workshop "an excellent learning experience" for the participants. (JG)
